

**BIOPROCESS  
SUPPLIES**

## FlexTainer™ 3D Bags

FlexTainer™ 3D Bags are designed for larger volume systems, specifically created for the use of cylindrical tanks and IBC totes.

The film was designed while keeping consistency, safety, and scaling up in mind. Known for its robust strength in terms of accidental punctures, sealing properties, and excels in chemical resistance.

## **Customization Available**

**Bioprocess Supplies can customize these 3D bags to help improve workflow, with configurations based on your project needs.**

**Work with us to help better determine what is needed for your design — such as sterile connections, sterile disconnects, specialized tubing, filters, and more!**

**Contact us today to get started on your 3D bag configuration!**
